Notes:

1. All weights are in grams.
2. The Thin Fire technique produces ultra-thin castings. These castings are fired at a lower temperature. See "Tips for Thin Castings" in the Project Ideas section of the Colour de Verre website, www.colourdeverre.com
3. Snowflakes can be filled to 35 grams and then fired to a tack fuse. See "Sugar Fire" Snowflakes' in the Project Ideas section of the Colour de Verre website, www.colourdeverre.com.
4. For detailed instructions, see "Branches, Pine Cones, and Small Leaves" in the Project Ideas section of the Colour de Verre website, www.colourdeverre.com.
